

## How an ecological disaster could develop

### Shift

With the weather deteriorating and the sea becoming choppier, the vessel is beginning to shift its position, raising fears that it could slide deeper into the sea and rupture its fuel tanks

Hull damage

Current water depth:  
**45ft**

Concordia could slide  
to a depth of  
**100ft**

### Fuel dispersal

Giglio island currently holds an award for the cleanest and most transparent sea in Italy. This could soon be affected
